

COMPOSITIONS AND METHODS FOR THE TREATMENT OF CANCER

ABSTRACT

This invention relates to compositions comprising thalidomide and another anti-
5 cancer drug which can be used in the treatment or prevention of cancer. Preferred anti-
cancer drugs are topoisomerase inhibitors. A particular composition comprises
thalidomide, or a pharmaceutically acceptable salt, solvate, or clathrate thereof, and
irinotecan. The invention also relates to methods of treating or preventing cancer which
comprise the administration of a thalidomide and another anti-cancer drug to a patient in
10 need of such treatment or prevention. The invention further relates to methods of reducing
or avoiding adverse side effects associated with the administration of chemotherapy or
radiation therapy which comprise the administration of thalidomide to a patient in need of
such reduction or avoidance.
